

JOB Senior React Developer Razorpay · Bangalore (Hybrid) ₹28-42 LPA · React · TypeScript · Redux · Next.js · TailwindCSS · Jest	CANDIDATE Aditi Iyer Frontend Engineer · Swiggy · 6 years Bangalore · ₹22 LPA → ₹32 LPA · Notice 60 days	DRIVE Senior React Hiring Drive Q2 Recruiter: Pratik (Admin) Session created · current_step = 1 → 7
---	--	---

1Select JD

Recruiter picks the job that this hiring drive will target.

MANUAL STEP

ACTION	Pratik opens "Senior React Hiring Drive Q2" and selects job #1 — Senior React Developer · Razorpay · Bangalore (Hybrid) . The job's required skills, salary band, and location are bound to this session.
RESULT	Session row created · `sessions.job_id` = 1 · current_step advanced to 2. · Session is now scoped to a specific job; subsequent steps reuse this context.

2Enhance JD

JD Enhancer turns a raw description into 5 ready-to-use sourcing assets.

AI STEP

JD Enhancer POST /enhance-jd Claude Sonnet 4.6	INPUTS job <job #1 fields> clientNotes — none — fields formattedJD recruiterBrief clarificationQuestions reachoutMaterial sourcingKeywords	OUTPUTS formattedJD # Senior React Developer · Razorpay\n\nBangalore (Hybrid) · 5-8 yrs · ₹28-42 LPA ... recruiterBrief "Senior IC role on the Checkout Web team. Owns React + TS in production. Looks for engineers shipping > 1 year on Next.js ..." sourcingKeywords booleanStrings ("Senior React" OR "Frontend Engineer") AND (TypeScript OR TS) AND (Next.js OR Redux) AND Bangalore primaryKeywords React TypeScript Next.js reachoutMaterial linkedinMessage "Hi Aditi, your work on Swiggy's checkout flow caught my eye ..." clarificationQuestions What's the team size and reporting structure? Is the role IC or hands-on lead? ...7 sections total
RESULT	All 5 assets persisted to `sessions.enhancement_data`. Reused by Step 3 (resume scoring), Step 5 (MCQ context), and reach-outs.	

3Source Candidates

Add candidates from the database; AI scores match quality and flags AI-written resumes.

AI STEP

ACTION	Pratik adds Aditi Iyer from the candidate database. Two agents fire automatically.	
Resume Quality Evaluator POST /sessions/1/candidates/47/evaluate Claude Haiku 4.5	AI Content Detector POST /ai/check-ai-content Claude Haiku 4.5	
INPUTS candidate Aditi Iyer · 6 yrs · React/TS/Next.js · Swiggy job Senior React Developer (skills: React, TypeScript, Redux, Next.js, TailwindCSS, Jest)	OUTPUTS Resume Quality Evaluator overall 88 contentQuality high experienceLevel senior verdict Strong match — 5 of 6 required skills present, senior IC trajectory. strengths Production Next.js at scale 6 yrs in B2C frontend Jest + RTL exposure AI Content Detector verdict likely_human confidence 92 summary Idiosyncratic phrasing, specific project metrics, no template patterns.	
RESULT	`session_candidates` row inserted with match_percentage=88, screening_status="pending". AI flags shown as badges on the Step 3 card.	

4Recruiter Screening

Manual screening — Pass / On Hold / Reject. Optionally launch a live call.

AI STEP

ACTION	Pratik opens Aditi's card, clicks " Screen via Call ". Calling CoPilot fires up with JD + resume context. After a 9-minute conversation, Pratik marks her PASS .	
Live Follow-Up Suggester (during call) POST /ai/suggest Claude Haiku 4.5		
INPUTS transcript rolling last ~6 candidate utterances currentQuestion optional — what the recruiter is currently asking	OUTPUTS suggestions Walk me through the trickiest bug you debugged in your Next.js checkout flow. How did you decide between Redux Toolkit and Zustand on Swiggy's order tracker? What's your biggest blocker to a 60-day notice period?	
RESULT	screening_status → "pass". Aditi unlocks Step 5. Call SID logged; transcript captured for the QA report later in Step 6.	

5Assessment Round

Send Aditi a Video Interview. The VI evaluator scores her response across 5 competencies.

AI STEP

ACTION	Pratik selects the Video Interview sub-mode, clicks Generate Questions , then Send Invite . Aditi records on her own time. After completion, Pratik clicks Evaluate .	
VI Question Generator POST /vi/interviews/12/generate Claude Sonnet 4.6	VI Evaluator POST /vi/candidates/47/evaluate Claude Sonnet 4.6	
INPUTS VI Question Generator jobDescription formatted JD from Step 2 count 5 VI Evaluator transcribedResponses 5 × ~3-min answers (Deepgram) jobDescription formatted JD	OUTPUTS VI Question Generator { question_text: "Walk us through your most recent end-to-end project.", type: "behavioral", time: 4 } { question_text: "How would you architect a payments dashboard for 1M req/day?", type: "technical", time: 5 } + 3 more VI Evaluator overall_score 84 hiring_recommendation good_fit competency_scores technical_skills 88 communication 82 problem_solving 85 leadership 76 cultural_fit 88 evaluation_summary Solid technical depth; slight clarity gap when discussing trade-offs. Recommend advancing.	
RESULT	`video_evaluations` row written. UI shows score 84 + "Good Fit" pill on Aditi's card. Step 6 unlocked.	

6Decision

Recruiter sets interview level, marks Proceed/Pool, and the post-call AI generates two reports.

AI STEP

ACTION	Pratik sets level L1 , decision Proceed , and schedules the technical panel for 14 May at 11:30 AM. The earlier screening-call transcript is now used by the report generator.	
Call QA + Candidate Report POST /ai/generate-reports Claude Opus 4.6		
INPUTS transcript ~9 min, 38 turns role Senior React Developer candidate Aditi Iyer recruiter Pratik jd <formattedJD> resume <resume text>	OUTPUTS qaReport summary score 78 verdict READY WITH CONDITIONS riskLevel Low weakest_dimension Closing Effectiveness (12/15 — 80%) nudges label Closing with Clarity weak "I'll let you know on next steps." better "Next is a 45-min tech round with the Razorpay lead architect — typically within 5 working days. Can I lock in your availability?" candidateReport recommendation 82 overallFit Production Next.js + TS strengths Strong communication Cultural fit signals concerns 60-day notice Expected CTC at top of band	
RESULT	Both reports persisted to `reports` table. QA report appears in Recruiter QA module. Candidate report opens in Step 6 panel for the panel reviewer.	

7Pipeline Tracker

Kanban view — move Aditi through Selected / On Hold / Rejected. Inline interview rescheduler available.

MANUAL STEP

ACTION	After the technical panel passes, Pratik drags Aditi's card from Pending to SELECTED and adds a voice note: "Panel happy. Sending offer at top of band."	
RESULT	`session_candidates.pipeline_status` = "selected" · `selected_at` = 2026-05-08 · Aditi auto-transfers to POFU module on offer acceptance. · Session candidate is closed-won. POFU engine starts the offer-to-Day-1 lifecycle (separate module).
